The Workforce Investment Opportunity Act presents some major and challenging shifts for workforce development organizations. This is much more than a new set of performance standards or tweaking the way we serve job seekers and businesses. WIOA represents a very new and comprehensive vision for workforce development. While much of the discussion about WIOA has been about changes at the federal, state and WIB levels, much less has been said about what this new era means for people doing the work on the front lines and their management. **What needs to change in your organization to make you successful with WIOA?** This workshop presents some unique perspectives that will enable your staff and management to deliver what WIOA demands and even more as they learn to work in the WIOA way!

- * This training will take you through the **five seismic shifts in mindset, program design and services** that will make your organization an outstanding WIOA model!
- * You will get ideas for all of the major aspects of your services and culture that need to change to **match the vision and outcomes of WIOA!**
- * Learn how to **reinvent job seeker and business services** to match what WIOA asks you to deliver!
- * Get important information about how to improve your work as a partner and **make your collaborations more successful than ever!**
- * Learn the major problems **disconnected youth** have with our services so you can change the way you serve them!
- * Discover how to change your hiring so you will not be hiring the WIA employee of the past, but **the WIOA employee of the future!**

This comprehensive overview will take you far into working in the WIOA way. By the end of the workshop, you will have the elements of a Program Improvement Plan that will guide you through the transformation from WIA to WIOA. If you want your organization to be at the WIOA state-of-the-art, bring this workshop to your organization now!
